DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 125 and 131-161 in the reply filed on 04/18/2008 is acknowledged. The traversal is on the ground(s) that the groups do not overlap in scope. This is not found persuasive because the examiner's interpretation of each and every element in the claims question provided grounds to conclude that there are small variations in scope that merits the restriction as disclosed in the Restriction Requirement. Accordingly, the requirement is still deemed proper and is therefore made FINAL.

Claims 62, 66-68, 71, 74, 80, 81, 87, 88, 90, 91, 92-108, 110-113, 115, 117, 118, 121, 123, and 124 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 04/18/2008.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 125, 131-139, and 141-161 are rejected under 35 U.S.C. 102(b) as being anticipated by Haak et al. (US 4,927,408). The cited patent discloses a dermal patch comprising an electrochemical cell and at least two electrodes in electrical connection with the electrochemical cell, the electrodes for electrically coupling to a skin portion of a subject, wherein at least one of the at least two electrodes is integrally formed on or with the electrochemical cell.

In the justification for the above rejection, the examiner notes for the record that the claim does not describe the structural elements of the electrochemical cell. Additionally, concerning the word "integral", the case law on point established that designing a structural element as "integral" or "separable" is an enhancement that does not merit patentability, and moreover, said enhancement should be considered an obvious alternative in the design process of the particular apparatus.

Allowable Subject Matter

Claim 140 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel A. Mendez whose telephone number is 571-272-4962. The examiner can normally be reached on 0730-1800 hrs.
